# Kingston Brings Next-Gen Performance with NV2 PCIe 4.0 NVMe SSD

**Taipei – October 12, 2022** – Kingston Technology, a world leader in memory products and technology solutions, today announced the launch of the **NV2 PCIe 4.0 NVMe SSD** for users looking for power-packed Gen 4x4 NVMe PCIe performance in a compact form factor, ideal for thinner notebooks, small form factor (SFF) systems, and DIY motherboards.

The Kingston NV2 PCIe 4.0 NVMe SSD is a substantial next-gen storage solution powered by a Gen 4x4 NVMe controller. Kingston NV2 delivers read/write speeds up to 3,500/2,800MB/s<sup>1</sup> for an overall faster system to keep up with a range of workloads, from Adobe suites to gaming. With lower power requirements and consumption, the SSD helps optimize system performance and deliver value without sacrifice. The compact single-sided M.2 2280 (22x80mm) design expands storage up to 2TB<sup>2</sup> while saving space for other components impeccably.

Kingston NV2 is compatible with both Gen3 and Gen4 platforms, Gen3 users can benefit from NV2 performance now and still be able to utilize the SSD drive after they upgrade to a Gen4 platform. As a

Available in capacities from 250GB – 2TB<sup>2</sup>, NV2 will give users storage space they need for applications, documents, photos, videos, and more. Kingston also offers the Kingston SSD Manager application which allows users to monitor drive health and disk usage, update drive firmware and securely erase data.

“As the supplier that topped channel SSD shipments in 2021, Kingston has always worked towards coming up with products and services to empower our users,” said Kingston, “We’re excited to bring the user experience to the next level with the next-gen successor, NV2. Whether users are upgrading to meet their ever-evolving work from home needs, or building a new PC for gaming, the new NV2 is tailor made to provide speed, and dependability at a compelling price point.”

<sup>1</sup> Based on “out-of-box performance” using a PCIe 4.0 motherboard. Speed may vary due to host hardware, software and usage.

<sup>2</sup> Some of the listed capacity on a Flash storage device is used for formatting and other functions and is thus not available for data storage. As such, the actual available capacity for data storage is less than what is listed on the products. For more information, go to Kingston’s Flash memory guide at [kingston.com/flashguide](http://kingston.com/flashguide).

<sup>3</sup> Total Bytes Written (TBW) is derived from the JEDEC Client Workload (JESD219A).

<sup>4</sup>Limited warranty based on 3 years or “Percentage Used”, which can be found using the Kingston SSD Manager ([Kingston.com/SSDManager](http://Kingston.com/SSDManager)). For NVMe SSDs, a new unused product will show a Percentage Used value of 0, whereas a product that reaches its warranty limit will show a Percentage Used value of greater than or equal to one hundred (100).
